DRY MOUTH Review

"...I was left with dried up salivary glands and a very dry mouth, I was given a sample of Denta - Med Gel to try and haven't looked back... love this product my dentist can't believe how great my mouth hygiene is after using this product for about 3 years. Just recently I tried Denta-Med Dry Mouth Oral Hygiene spray to use and keep in my bag during the day when I'm out and about can't speak highly enough of these products, best of all these products are Australian made."

DRY MOUTH Products

Replace your regular tooth paste with
Denta-Med™ DRY MOUTH Gel

Apply between 2 - 3mL **Denta-Med™ DRY MOUTH Gel** on a toothbrush (or oral swab, finger brush or moistened gauze square) Expel (spit out) residue in the sink. Do Not Rinse after use
Denta-Med™ DRY MOUTH Oral Hygiene Spray
Shake well before use Rotate the 360 degree extended nozzle to a comfortable angle. Open mouth, gently insert the nozzle halfway inside the mouth. Keep mouth open and direct the nozzle towards the buccal (inner cheek) region. Spray 4 times on each side. Repeat as frequently as required. Effective when used in conjunction with **Denta-Med™ DRY MOUTH Gel** for relief from a dry, uncomfortable mouth throughout the day
